Yes, we have used heat paste but wet rags torn into thin strips works just as good and readily available.

Reply by tim@tnrappliance.com on Dec 20, 2018

this new aluminum is crap can baerly heat it and the copper tip comes off. i now get to redo the job when i get another heat exchanger. has anyone used an apoxy to set the tubes.

bradleysapplianceservice@shaw.ca on Jun 5, 2018

Use caution when brazing, must use heat sink to avoid melting the aluminum. Use heat paste or wet rags. Also be sure check ports before installing. We have had a plugged port from factory when they installed the copper ends they closed off the port internally. Can't be seen easily so use nitrogen to blow through ports to be sure they are not plugged. It would have been nice to see at least 3 more inches of copper on the ends. It's easier to cut the above tubing to size than deal with these stubby copper ports.
